The AS-2700 transcription kit offers an essential solution for effortless digital dictation file transcription. It includes the ODMS R8 on-premise transcription software, a 3-pedal foot control, and headphones. This hands-free solution allows typists to efficiently download, organize, and transcribe audio files sent by authors, supporting DSS, WAV, and MP3 file formats. It seamlessly integrates with your office workflow, saving time and enhancing productivity

- Access dictations via Email, FTP and shared storage.
- Play, rewind, and fast forward audio files. Speed control options ranging from 50% to 200%.
- Read and add additional comments made by the Author.
- Live Status updates between Author and Transcriptionist (Unfinished, Pending, Finished).
- Offers traditional transcription and compatible with speech recognition software (sold seperately).
- Online meeting audio capture functionality.
- Automatic routing options between Authors and Transcriptionists.
- Includes ODMS R8 ON PREMISE Software (Transcription Module), 3-pedal foot control & headphones.
